

Special Issue

Oral Health Promotion in Paediatric Population (Volume II)

Message from the Guest Editor

The aims of this Special Issue are to document the various models employed for the promotion of oral health in the pediatric population, with a focus on the early years. The publications will describe whether these health promotion efforts are geared towards specific populations, specific age groups, whether they are delivered as part of a public health effort or directed towards individual families. Any research that documents the effectiveness of those models will be welcome. Academics with novel research proposals in this area can submit their approved research proposals. Systematic reviews of published research in this area will also be considered. Lastly, commentaries on efforts to have local public health authorities adopt oral health promotion as a part of mother–child health promotion will also be considered. Keywords:

- oral health promotion
- infant oral health
- childhood oral health
- disease prevention
- oral health education
- public health policy

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
