Maternal–Fetal Health: Helping Children Grow

Message from the Guest Editor

Prenatal diagnosis has been a staple in the field of maternal–fetal medicine for many years. New tools for ultrasound diagnosis, new screening strategies with which to identify serious diseases such as pre-eclampsia, risk of premature birth, and fetal anomalies, and the implementation of various preventive measures are among the latest achievements aimed at safeguarding maternal health and reducing fetal and neonatal morbidity and mortality. This Special Issue will highlight recent advances in maternal–fetal medicine, including new approaches to fetal genetics and prenatal diagnosis and screening. Special attention will be paid to topics such as placental insufficiency, fetal malformation, fetal dysplasia, and genetic abnormalities. Original research articles, systematic evaluations, analyses, and case-based comments are welcome. I look forward to receiving your contributions

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
