Advances in Gastrointestinal Surgery in Children

Message from the Guest Editors

The field of gastrointestinal surgery in the pediatric population is continuously evolving due to new insights and novel (technical) advances. Not only novel insights due to basic studies on the pathogenesis of surgical diseases but also the development and introduction of new surgical techniques and technical possibilities will influence gastrointestinal surgery in children in the next era. The main goal of these recent advances is to optimize the outcomes for these vulnerable patients and their parents. Innovations are needed, but knowledge about these developments should also be distributed around the world to ensure quick implementation. We would therefore like to invite you to submit your innovative work to this Special Issue of *Children*.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
