

Special Issue

Research Progress of the Pediatric Cardiology: 4th Edition

Message from the Guest Editors

Considering the success and popularity of the three previous Special Issues published in the journal *Children* (https://www.mdpi.com/journal/children/special_issues/Research_Progress_Pediatric_Cardiology; https://www.mdpi.com/journal/children/special_issues/Y40A16K8JG; https://www.mdpi.com/journal/children/special_issues/8G20C509S3), we are now releasing another issue aiming to gather original research papers and review articles focused on pediatric cardiology. I am honored to have been asked to serve as the for this valuable project again. The aim of this Special Issue is to produce a rich collection of research, articles and opinions for clinicians, academics and policy makers in the field of pediatric cardiology. Contributions related to all aspects of this topic and, in particular, the understanding, management and improvement of cardiovascular diseases in children, are welcome. Innovative papers on new cardiovascular treatments, prognostic indicators and imaging techniques, as well as studies focused on the impact of disruptive events (i.e., the COVID-19 pandemic), are particularly welcome. I look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
