Advancements and Challenges in Pediatric Trauma Surgery: Current Practices and Future Directions

Message from the Guest Editors

Pediatric trauma surgery has evolved significantly over recent decades, shaped by advances in diagnostics, surgical techniques, and multidisciplinary care. This Special Issue aims to provide a comprehensive overview of current practices while highlighting emerging trends and innovations in the management of pediatric trauma. We particularly focus on cutting-edge research that addresses both surgical and non-surgical strategies, long-term outcomes, and quality-of-life considerations. We invite original research articles, reviews, and clinical studies that explore novel approaches, evaluate current treatment protocols, or propose future directions to optimize care for injured children.

Guest Editors

Dr. Martin Gottliebse

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
