Pediatric Vestibular Disorders: Advances in Diagnosis and Treatment

Message from the Guest Editors

Vestibular disorders in children are increasingly recognized as an important source of morbidity, with clinical manifestations ranging from recurrent vertigo and imbalance to motor and cognitive delays. Historically, these conditions were underdiagnosed due to the challenges of obtaining reliable histories from children and the limitations of pediatric vestibular testing. The recent development of specific diagnostic criteria for pediatric episodic vestibular syndromes by the Bárány Society has provided greater clarity, enabling improved patient stratification and fostering clinical research in this area. This Special Issue will highlight advances in diagnosis, clinical management, and long-term outcomes of pediatric vestibular disorders, including, but not limited to, vestibular migraine, recurrent vertigo of childhood, and vestibular dysfunction associated with hearing loss or cochlear implantation. We invite contributions from clinicians and researchers across disciplines to promote a comprehensive understanding and improve care for affected children.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
