

## Special Issue

# Family Centered Neonatal and Maternity Care

### Message from the Guest Editors

In the last 50 or so years, with exponential improvements in survival of mothers and sick newborns, a movement towards bringing back mothers and families to the side of their infants while receiving specialized care has gradually spread. Family centered care, where provider collaboration with the family holds an important and vital role in ensuring the ultimate health and well-being of the infant and mother, has become a fundamental care practice in the neonatal intensive care unit and maternity care service. Though the definition of family centered neonatal and maternity care differs somewhat between the various disciplines, the common concepts include individualized care, which promotes infant–parent engagement, is culturally sensitive, and actively involves the parents/family in decision making.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
