

## Special Issue

# Update on Pediatric Nutritional and Metabolic Disorders

### Message from the Guest Editors

Adequate nutrition is necessary for the optimal functioning of human bodies. Nutritional diseases affect not only mortality and morbidity, but also physical growth, intellectual development, school performance of children, and all aspects of human and social development. We invite colleagues involved in the management of children with nutritional diseases and IEMs to present their experience regarding clinical insights, diagnostic challenges, therapeutic interventions and adherence, the relationship with the gut microbiome, vitamin and mineral deficiencies in different nutritional diseases, growth problems, multidisciplinary strategies and cutting-edge research that advance our understanding of these complex disorders, psychological problems in children and their families and national health programs for IEMs. This Special Issue aims to catalyze improvements in accurate diagnosis and tailored treatment plans for affected children and welcomes submissions of original research papers, meta-analyses, systematic reviews, case studies, and expert opinions.

### Guest Editors

Dr. Dana-Teodora Anton-Păduraru

Department of Mother and Child Medicine, Discipline of Pediatrics, "Grigore T. Popa" University of Medicine and Pharmacy, 700115 Iasi, Romania

Prof. Dr. Veronica Mocanu

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
