

## Special Issue

# Advances in Mental Health and Well-Being in Children

### Message from the Guest Editor

Mental disorders are the largest cause of the burden of disease in the world. Evidence is accumulating on the broad impact that the well-being one has during childhood and adolescence has on physical and mental health across the course of a lifetime. In fact, most of the disease burden affecting adults has its onset during childhood and adolescence.

There is a growing concern about the mental health and well-being of children, with increasing demand for counselling services and referrals to mental health services. It has been well established in the existing literature that children and young people who experience positive support from parents and teachers may develop psychological resilience.

We are now set to release a Special Issue that aims to address this topic by inviting scholars to share their findings, perspectives, and approaches, with the aim of promoting child mental health and well-being.

Qualitative or quantitative contributions from basic or applied research that will improve the knowledge on key topics within this field are welcomed.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
