

Special Issue

Research on Clinical Pediatric Dentistry

Message from the Guest Editor

Pediatric dentistry has a significant impact on a child's future in a variety of educational and professional settings. Early intervention in managing children's dental health not only improves the diagnosis and treatment planning process but also leads to better planning and increased confidence in diagnostic procedures. Three-dimensional imaging proves valuable across the spectrum of dentistry, pediatric included, by facilitating the capture of precise images and enhancing the accuracy of diagnoses. The aim of this Special Issue is to bring together cutting-edge dental resources, integrating contemporary insights from clinical pediatric dentistry for the purpose of diagnosis and treatment planning. We hope that it will serve as a guiding framework for future innovative research in the field.

This Special Issue is open to submissions from professionals, researchers, and dental practitioners. We gladly extend an invitation to you to be part of our team, and we look forward to receiving your valuable contribution!

Guest Editor

Dr. Oana Almasan

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
