Special Issue

Renal and Cardiovascular Consequences of Prematurity

Message from the Guest Editors

Through this Special Issue, we would like to increase awareness regarding the long-term cardiovascular consequences of preterm birth. Acceptable articles for this Special Issue include original research articles or reviews related to this topic. Neonatologists sharing their knowledge on the early prevention of kidney injury is also welcome. Avoiding hit after hit for the cardiovascular system and the kidneys would be an excellent prevention strategy that we look forward to highlighting.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
