Special Issue

Changes to Face the Future in Pediatric Dentistry

Message from the Guest Editors

Current pediatric dentistry, made up of multidisciplinary teams, follows the concept of "Evidence-Based Dentistry", integrating the most current scientific knowledge into daily clinical practice. Undoubtedly, the most prevalent disease in pediatric patients continues to be dental caries, however, periodontal disease, dental trauma and malocclusions affect a large number of pediatric patients. During the last decades, the progress in pediatric dentistry and changes in the dentistpatient-caregiver triangular relationship as a result of scientific and social changes have led to the adaptation of clinical professional activity and the emergence of multiple new materials, therapeutic techniques, and approaches. The latest medical advances have also managed to improve dental care for smaller and more vulnerable groups such as those with "rare diseases" or patients with special needs. All these changes are what led us to create "new approaches to old problems". Our objective in this Special Issue is to announce the advances in pediatric dentistry, enabling us to share information among professionals from all over the world.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
