Growing Up Unequal: Family Complexity, Child Maltreatment and Child Well-Being

Message from the Guest Editors

Families change constantly and contemporary family structures are more complex and diverse than those from a decade or even longer ago in any country. With rapid changes occurring in family structures globally, there is a pressing need for additional research to examine child maltreatment and/or child well-being within these complex structures. Developing a more in-depth knowledge base of child maltreatment and child well-being in diverse family structures would empower us to better integrate family complexity into the improvement of child well-being through services and policies. We invite you to submit manuscripts that address family complexity and child maltreatment/child well-being that also address the implications for practices and policies. We enthusiastically invite a variety of research from different countries and diverse populations, and welcome submissions employing various research methodologies, including qualitative, quantitative, mixed methods, and systematic/scoping reviews. By encompassing diverse approaches, we seek to gather a comprehensive array of perspectives on this important topic.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
