

## Special Issue

# Nutrition to Improve Child and Adolescent Health

### Message from the Guest Editor

Nutrition, a complex science linking many concepts, including social, behavioural, biological and genetic aspects, is an essential player in the development and health of children and adolescents. Nutrition has a significant impact on healthy children, but also on those with chronic diseases and those in acute care settings. The goal of this Special Issue is to collect knowledge to better understand how nutrition can be used for prevention and treatment in pediatrics. We are seeking high-quality papers of various designs, including (but not limited to) qualitative studies, randomized controlled trials, cohort studies, cross-sectional studies, systematic reviews, and meta-analyses. Studies in various fields of nutrition are welcome.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
