

Special Issue

2nd Edition: Children's Mental Health, Parenting, Family and Groups' Resilience in Crisis

Message from the Guest Editors

The COVID-19 pandemic has brought the world to its knees, provoking health, social, and economic upheavals, potentially contributing to widespread emotional distress and an increased risk of psychiatric disorders in people of all ages. Even after three years of the health emergency state related to COVID-19, it is necessary to assess the impact of these events on the mental health of children, adolescents, parents, and families. The purpose of this Special Issue, which is the 2nd edition of the Special Issue "Children's Mental Health, Parenting, Family and Groups' Resilience in Crisis", is to publish relevant research dealing with the way family, parents, and children/adolescents manage stress in times of crisis, with consistent clinical implications, to strengthen individuals and groups to enable the development of their resilience. We encourage authors to send a short abstract (500 words max.) and a tentative title in advance. Completed manuscripts must be submitted via the online portal.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
