

## Special Issue

# Advances in Pediatric Endocrinology and Metabolic Disorders

### Message from the Guest Editor

The rising incidence of pediatric endocrine and metabolic diseases has attracted increased attention in recent years. One potential cause is the "modern" lifestyle, which includes significant differences in diet and physical activity compared to the patterns practiced several decades ago. In addition to metabolic diseases, related endocrine diseases, including vitamin D deficiency and thyroid–gonad disorders, also contribute to poor clinical complications and difficulties regarding management. The aim of this Special Issue “Advances in Pediatric Endocrinology and Metabolism Disorders” is to gather original research manuscripts, meta-analyses, and reviews related to endocrine and metabolic disorders in children, and the latest developments in their prevention and treatment, among other topics.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
