Palliative and End-of-Life Care in Pediatrics

Message from the Guest Editors

In the UK, a rising prevalence of children and adolescents with life-limiting diseases has been reported. Thus, there is a need for increasing care in both the in- and outpatient sectors. Especially in end-of-life care, children with life-limiting diseases can suffer from various symptoms, which can have a negative effect on the quality of life. This Special Issue invites you to contribute original research articles and reviews on “Palliative and End-of-Life Care in Pediatrics”. The editors are delighted to review manuscripts which focus on symptom management, psychological aspects of care, special needs and problems in end-of-life care with all the perspectives of a multidisciplinary team. If you would like to contribute, please feel free to contact us.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
