Current Strategies in Myopia Prevention and Management for Children and Adolescents

Message from the Guest Editors

Myopia in children and adolescents poses significant functional and social challenges, especially due to its global increase. Early onset and rapid progression are closely linked to severe complications, such as myopic maculopathy or glaucoma, in later life. This Special Issue, "Current Strategies in Myopia Prevention and Management for Children and Adolescents," aims to gather cutting-edge research on strategies to delay the onset and arrest the progression of myopia. We are seeking original research articles and reviews that focus on innovative clinical interventions (e.g., low-dose atropine, contact lenses, orthokeratology, or ophthalmic lenses); the role of environmental factors such as outdoor exposure; and population-based screening programs. Our goal is to consolidate evidence that supports better clinical care and public health initiatives to protect the visual future of younger generations.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Professor Emeritus, University of North Carolina at Chapel Hill, Chapel Hill, NC 27516, USA
