Family-Centered Care in Pediatric Health

Message from the Guest Editors

Dear colleagues, The number of children living with complex chronic conditions is rapidly increasing. Children with complex chronic conditions and their families try to live lives that are as normal as possible. Yet, the impact of disease and daily care tasks influences their ability and opportunity to participate in daily life and society. Healthcare professionals working with these families often rely on a disease-oriented approach, with a focus on disease and symptom management. Life goals are often not clearly explored or defined, which might prevent families from organizing their lives and family balance in an adequate way. This Special Issue will focus on exploring backgrounds and strategies with which to provide family-centred care in the context of children living with chronic complex conditions. Both reviews and original research (qualitative, quantitative, and mixed) will be considered for publication.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
