Special Issue

Current Progress and Future Trends in Children Oral and Maxillofacial Surgery

Message from the Guest Editors

Oral and maxillofacial surgery plays a critical role in addressing a wide range of congenital, traumatic, and acquired conditions in children. With ongoing advancements in surgical techniques, diagnostic tools, and patient care, the field has made significant progress in improving outcomes for pediatric patients. This Special Issue, "Current Progress and Future Trends in Children Oral and Maxillofacial Surgery", aims to highlight recent innovations and emerging trends, such as minimally invasive procedures, imaging, and personalized medicine. It also seeks to explore future directions that may shape the field, focusing on how interdisciplinary collaboration, technology, and patientcentered care can continue to enhance the quality of care for children requiring oral and maxillofacial surgical interventions. We welcome original research articles, reviews, and short papers covering issues related to the impacts of child oral and maxillofacial surgery.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
