

## Special Issue

# Advances in Neonatal Resuscitation

### Message from the Guest Editor

Neonatal resuscitation has come a long way in the past five decades and is constantly evolving. From word-of-mouth teaching methods, it has developed into organized programs. In this Special Issue, we aim to analyze current practices and discuss the emerging concepts that will shape the future of neonatal resuscitation. Our focus will be to present advances in neonatal resuscitation education, various steps, techniques, medications, and equipment involved contributing to neonatal transition, improving outcomes and minimizing long-term injury. We invite you to contribute articles on neonatal resuscitation to this Special Issue. Both reviews and original research will be considered for publication. Thank you.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
