Special Issue

Motor Competence in Children and Adolescents Holistic Developmental Perspective

Message from the Guest Editors

In the early childhood years, becoming more competent in different movement skills is essential to engage in physical activity. Indeed, the ability to be proficient in a broad range of locomotor, stability, and manipulative skills can influence children's lifelong physical activity habits and, consequently, their health status. In this context, knowledge has progressed much in recent decades. Thanks to the joint efforts of different research areas, we now have a better understanding regarding the relationship between children's motor competence and other motor variables in several contexts. However. research is scarcely relative to understanding motor competence in a more holistic developmental perspective. The goal of this Special Issue in *Children* is to highlight recent and new advances in this holistic developmental perspective related to this amazing period of childhood. The intended scope of the Special Issue is broad enough to accommodate different areas of expertise and research; therefore, this Special Issue seeks to highlight the relationship between motor competence and different variables.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
