

## Special Issue

# Clinical Insights into Pediatric Endocrine Disease

### Message from the Guest Editors

Pediatric endocrine diseases encompass a broad spectrum of conditions that impact growth, metabolism, and hormonal regulation from infancy through adolescence. Recent advancements in diagnostic imaging, molecular genetics, and novel therapeutic approaches have significantly improved our ability to detect and manage these disorders at earlier stages, leading to better patient outcomes. This Special Issue will explore the latest clinical insights into pediatric endocrine diseases, emphasizing innovations in diagnosis, treatment, and patient care. Topics of interest include, but are not limited to, congenital and acquired endocrine disorders, growth- and puberty-related abnormalities, metabolic syndromes, thyroid disorders, and the role of emerging technologies in endocrine evaluation. I look forward to receiving your valuable contributions to this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
