

## Special Issue

# Innovative Approaches to Treating and Preventing Pediatric Chronic Pain

### Message from the Guest Editors

Chronic pain continues to be one of the most prevalent, disruptive, and costly problems experienced by children and adolescents worldwide. Although studies have shown that the symptoms and impact of chronic pain, on average, can improve with some treatment approaches (psychological, rehabilitative, integrative, and/or medical/pharmacological), treatment adherence and outcomes are highly variable, and known treatment effect sizes have remained small to moderate over time. To maximize effectiveness and accessibility, contemporary treatment of pediatric chronic pain requires creativity and innovation.

The aim of this Special Issue of *Children* is to communicate cutting-edge, novel, and transformative approaches to improving the efficacy and/or reach of pediatric chronic pain treatment. We invite original research across the spectrum of pediatric chronic pain conditions, on all types of interventions, and from any stage of intervention development and testing (early stage and formative research methods through efficacy and implementation studies), assuming appropriate methodological rigor.

### Guest Editors

Dr. Mark A. Connelly

Division of Developmental & Behavioral Health, University of Missouri-Kansas City School of Medicine and Children's Mercy Kansas City, Kansas City, MO 64108, USA

Dr. William Robert Black

Department of Pediatrics, The University of Kansas Medical Center, Kansas City, KS 66160, USA

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Paul R. Carney  
Departments of Child Health and Neurology, University of Missouri, 400  
Keene Street, Columbia, MO 65211, USA
