

Special Issue

Pediatric Digestive Tract Disease: Surgical Aspects

Message from the Guest Editor

A new Special Issue in the open access journal *Children* (ISSN 2227-9067), entitled "Pediatric Digestive Tract Disease: Surgical Aspects", is now open for submissions. The aim and scope of this Special Issue is to establish a methodical approach to searching for everyday questions concerning surgical emergencies in childhood, diagnostic measures, therapeutic regimes, postsurgical care, and the prognostic values of pediatric surgical gastrointestinal diseases. Although this Special Issue cannot provide a substitute for a tutorial-type textbook on Gastrointestinal Surgery, it could be utilized by someone who is proficient in the fundamentals of pediatrics and pediatric surgery. It is not a systematic treatise on diseases of the gastrointestinal tract, but a collection of new and established facts that influence the natural course and results of certain surgical diseases and impact the relative success of various kinds of treatment. This Special Issue is as interesting and instructive to general physicians, family doctors and pediatricians as it is to pediatric surgeons.

Guest Editor

Prof. Dr. Igor Sukhotnik

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
