Current Status of Cancer Research in Adolescents—Problems of Children with Cancer

Message from the Guest Editor

A child's cancer affects their entire family and is a source of chronic stress for a sick child, as well as for their parents and siblings. It deprives the feeling of security, introduces uncertainty, fear, and destabilizes the current life. Families do not forget about the irreversibility and longevity of the disease, about the fact that the child will suffer physical and mental suffering, and is constantly accompanied by concern for the life and health of a loved one. At the same time, all everyday life becomes subordinate to illness. It has to reconcile the requirements of caring for a sick child with professional work, concern for finances, caring for healthy siblings and contacts with the surrounding social environment. This makes the cancer treatment process difficult, burdensome and sometimes even unacceptable for the whole family. The purpose of this Special Issue in *Children* is to draw attention to the physical, psychological and social problems of both children with cancer and their families. We encourage you to submit research results, scientific thoughts and experiences.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
