

Special Issue

Child Health and Surgery

Message from the Guest Editor

Pediatric surgery play a critical role in child health in resource-poor areas and pediatric surgery providers must lead the effort to prioritize children's surgery in pediatric health systems development. Pediatric surgical conditions cross a broad range of disease categories, including congenital and acquired anomalies, injuries, tumors. A tailored planning of surgery and a multidisciplinary approach is mandatory to optimize the result. This Special Issue "Child Health and Surgery" aims to publish original research, reviews, clinical studies, brief reports, case reports, and editorials covering surgical advances, innovations in multidisciplinary pediatric management, translational and basic research within the field of pediatric surgery. A better knowledge of innovative surgery is crucial to preserve neonatal, infant, child and adolescent physiopathology to optimize the health care and special needs child.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
