

Special Issue

Language Delay in Children: Diagnosis, Prognosis and Treatment Approaches

Message from the Guest Editors

The issue of language delay and the risk of developing a Developmental Language Disorder (DLD) remains a central concern in both clinical and research contexts. This Special Issue will bring together varied contributions, especially from countries and languages under-represented in the current literature. It will advance our understanding of early DLDs by exploring developmental pathways, underlying mechanisms, and evidence-based approaches for their diagnosis and intervention, both in isolated and co-occurring presentations. We welcome submissions addressing genetics, neural correlates, behavioral profiles, and policy frameworks related to DLD. Manuscripts may include original empirical studies, systematic reviews, meta-analyses, theoretical models, or intervention trials with theoretical, clinical, or policy implications that contribute to improving early identification and support for children and their families.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
