New Research in Pediatric Cerebral Palsy

Message from the Guest Editor

Historically known as “Little disease”, cerebral palsy (CP) is one of the most prevalent, early-onset, and life-long disabilities worldwide. Traditionally thought of as a disability that affects mobility and balance, other aspects associated with CP are also acknowledged. The research field related to CP is broad and thriving. For this Special Issue on pediatric CP, we are inviting researchers to contribute their novel work addressing the non-motor aspects of CP, including, but not limited to, **cognition, sensation, communication, perception, and behavior**. The submission of high-quality, methodologically and sound clinical, epidemiological, and translational research is highly encouraged. We are excited for this opportunity to engage in and learn about these crucial topics affecting the lives of millions of children and adolescents with CP around the world.

Guest Editor

Dr. Ann Alriksson-Schmidt

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
