

Special Issue

Research of Pediatric Infectious Disease

Message from the Guest Editor

Infectious diseases refer to infections passed from person to person and are caused by bacteria, viruses, fungi or helminths. Despite medical advances in regard to new treatment options and better access to healthcare, multidrug resistance is an ever-present issue.

This Special Issue is intended to bring together original articles, reports, systematic reviews, meta-analyses, reviews and interesting cases that provide a view of the current state of infectious diseases in children. Potential topics include, but are not limited to, the following:

- Etiology and pathogenesis mechanisms of bacterial, viral, fungal and parasitic infections in children;
- Epidemiology of infectious diseases in children;
- Potential biomarkers and diagnostic tests for pediatric infections;
- Treatment options and strategies in pediatric cases;
- Antimicrobial stewardship for children in the era of multidrug resistance;
- Impact of the COVID-19 pandemic in regard to pediatric infectious diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
