

## Special Issue

# New Frontiers in Early Childhood Oral Health Care

### Message from the Guest Editors

This Special Issue will cover several aspects of paediatric dentistry with an emphasis on childhood caries, the first months of life and how to develop good oral health, and new frontiers in paediatric dentistry and in prevention. Uneven epidemiology has consequences for caries risk assessment, treatment plans, patient/parent motivation, and public health measures, each itself a topic to be explored. We will deal with carrying out very in-depth research on the risk of caries, which is a very important topic at this point in time and which greatly influences epidemiology. We will also investigate the study of new technological tools used in Paediatric Dentistry.

---

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
