Economic Resources and the Development of Children and Adolescents

Message from the Guest Editors

Decades of research have documented that family economic resources matter for children's and adolescents' development. Economic resources are indispensable to the satisfaction of material needs, providing children and adolescents with food security, safe housing, goods and services that enable them to thrive. Families' economic resources also provide real and psychological security, avoiding stress and fostering parents' capacity for good parenting. Disparities in economic resources are, however, pervasive and growing, and this is especially the case among families with children. Because the consequences of these disparities are multiple and overlapping, it is crucial to examine the different pathways through which they operate. Studying the impact of economic disparities on children's and adolescents' development would help us gain a better understanding of the underlying reasons and improve the design of interventions to reduce the detrimental effects of such inequalities.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
