Innovative Strategies for Managing Esophageal Disorders in Children: Recent Findings and Clinical Applications

Message from the Guest Editor

Esophageal disorders encompass a spectrum of conditions that affect the esophagus, including gastroesophageal reflux disease (GERD), achalasia, and Barrett's esophagus, as well as esophageal atresia (EA) and tracheoesophageal fistula (TEF). GERD, achalasia, and Barrett's esophagus commonly manifest as heartburn or swallowing difficulties and pose an increased risk for esophageal cancer. The aim of this Special Issue is to gather and share recent knowledge on the management of comorbidities associated with esophageal disorders of Children. We welcome manuscripts of various types, including reviews and original articles, that focus on new and innovative approaches or address rare but critical conditions associated with esophageal disorders. Contributions from basic science research are also encouraged. We eagerly anticipate receiving your submissions and sharing them with our readers.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
