

Special Issue

Digital Frontiers in Youth Suicide Prevention: Risks, Resilience, and Interventions

Message from the Guest Editors

This Special Issue will explore how digital spaces—such as social media, gaming platforms, virtual reality, AI-driven mental health support, and telehealth/teletherapy—affect the risk of suicide, resilience, and intervention strategies among children and adolescents. The scope of this Special Issue includes, but is not limited to, the following topics:

- Social Media and Suicide Risk: The impact of online communities, cyberbullying, and exposure to self-harm content.
- Digital Resilience: Protective factors, such as positive online communities and digital mental health literacy.
- AI and Chatbots in Crisis Intervention: The role of AI-based tools in early detection and intervention.
- Teletherapy and Mobile Health (mHealth) Apps: The effectiveness of digital interventions and remote support.
- Gaming and Mental Health: The intersection between gaming behaviors, social connectivity, and suicide risk.
- Ethical and Policy Considerations: Privacy, data security, and responsible use of AI to address the mental health of the youth.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
