

Special Issue

The Latest Challenges and Explorations in Pediatric Nursing

Message from the Guest Editor

This issue aims to illuminate the emerging challenges pediatric nursing professionals face in a rapidly evolving global context. We welcome all types of papers that address this topic, with particular focus on papers that reflect the integration of new technologies and artificial intelligence in nursing care, the impact of climate change on child health, and studies about under-researched populations, such as children with rare diseases or complex medical conditions. We invite contributions that address the impact of recent humanitarian crises on pediatric nursing care and highlight how nurses adapt to meet the physical, emotional, and social needs of children in vulnerable situations. We encourage submissions of research articles, reviews, or case studies that examine evidence-based practice, ethical considerations, policy implications, and strategies for advancing pediatric nursing care. This Special Issue will explore the diverse and complex landscape of pediatric nursing today.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
