

Special Issue

Nursing Care of Children with Chronic Conditions

Message from the Guest Editors

In this Special Issue titled 'Nursing Care of Children with Chronic Conditions', we wish to focus on the impact of chronic illness on children and parents, as well as the practical consequences of addressing their physical, psychological, and social needs, empowering them to be 'experts' in their care. We will address current recommendations and evidence-based practice, as well as the implications of having a sibling with a chronic condition. For each of these areas, specific attention will be devoted to contemporary political, economic, and social policies as well as climate change, which influence children's healthcare and provide problems for managers and professionals. Finally, we encourage our contributors to submit articles, whether research, reviews, or case studies, that address issues related to classic and contemporary theories of grief, loss, coping, hope, and adaptation; ethical, legal, and professional aspects of nursing children and young people with chronic illnesses; home hospitalization; the importance of acute emergency care; and planning and realizing a child's effective transition to adult services.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA
