Special Issue

Advances in Children with Cerebral Palsy and Motor Impairment

Message from the Guest Editor

It is now widely recognized that cerebral palsy (CP) requires long-term, multidisciplinary care. In recent decades, significant advances have been made in early diagnosis, neurorehabilitation, and, above all, the use of technologies in pediatric age—offering new opportunities to improve outcomes and quality of life. We are pleased to invite you to contribute to this Special Issue, which aims to explore current trends, innovations, and future directions in the care and research of children with CP. Our goal is to showcase innovative approaches across clinical practice, rehabilitation science, and technology. We welcome original research articles, systematic reviews, and translational studies. Topics of interest include, but are not limited to, the following addressing:

- Novel therapeutic interventions and models of care;
- Robotics, virtual reality, and digital rehabilitation tools;
- Early detection and neurodevelopmental monitoring;
- Outcome measures and classification systems;
- Family-centered and community-based approaches.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

 free for readers, with article processing charges (APC) paid by authors or their institutions.
