

Special Issue

Cutting-Edge Laparoscopic and Thoracoscopic Surgery in Children

Message from the Guest Editor

The Special Issue "Cutting-Edge Laparoscopic and Thoracoscopic Surgery in Children" explores the latest advancements in surgical techniques designed to reduce trauma and improve recovery outcomes in young patients. Topics include cutting-edge laparoscopic and thoracoscopic procedures and innovative tools. By highlighting basic science, clinical studies, and systematic reviews, this issue aims to provide a comprehensive understanding of the efficacy, safety, and future directions of minimally invasive surgery in neonates and children, ultimately enhancing pediatric surgical care. We invite submissions that cover any aspects of minimally invasive surgery, laparoscopic surgery, and thoracoscopic surgery in children. We look forward to receiving innovative contributions that will help shape the future of pediatric laparoscopic and thoracoscopic surgery.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
