

Special Issue

Physical and Motor Development in Children

Message from the Guest Editors

The Special Issue focuses on physical and motor development in childhood, a critical issue for lifelong human development and health. For decades, there has been a growing interest in research focusing on the biological and physiological changes that occur from birth throughout childhood and adolescence, and the factors that affect growth and motor development. The aim of this Special Issue is to include research that investigates thoroughly factors that contribute to physical and motor development, a disorder that affects motor learning and the acquisition of motor skills.

Moreover, assessment tools that are used to examine motor competence and physical and motor development are among the main foci of this Special Issue, as well as clinical or educational interventions aiming to improve physical and motor development. We invite contributions that address a wide range of topics, including, but not limited to, physical development milestones, developmental disorders, motor learning and control, and physical activity studies in clinical and educational settings regarding children and adolescents.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
