

## Special Issue

# Kawasaki Disease, MIS-C and COVID-19

### Message from the Guest Editors

The pandemic caused by coronavirus disease 2019 (COVID-19) began, as the name suggests, in 2019 and has been ongoing since. The effect of COVID-19 on children is usually mild, but some are susceptible to a novel Kawasaki-like disease, also known as multisystem inflammatory syndrome in children (MIS-C). Kawasaki disease (KD) is different than MIS-C in terms of age, severity, clinical presentation, susceptibility, immune response, cause, and therapy. Coronary artery involvement, the BCG vaccination relationship, mucosa/skin manifestations, and treatment strategies have shown great overlap between KD and MIS-C. This Special Issue focuses on articles outlining comparisons between KD and MIS-C.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Paul R. Carney  
Departments of Child Health and Neurology, University of Missouri, 400  
Keene Street, Columbia, MO 65211, USA
