

## Special Issue

# Pediatric Asthma: Advances in Diagnosis, Novel Therapies, and Long-Term Outcomes

### Message from the Guest Editor

Aim and scope of the Special Issue: Asthma is a multifaceted condition that is difficult to recognize and manage, particularly in young people, as several factors (genetic, environmental, occupational, hormonal and psychological) can influence its evolution over time. For these reasons, a new Special Issue has been dedicated to innovations in pediatric asthma, with the aim of updating and optimizing each step of the diagnostic pathway and therapeutic approach, thus avoiding preventing asthma from evolving into a disabling condition. Cutting-edge research: Whichever report on innovation research concerning pediatric asthma. What kind of papers we are soliciting: Papers concerning updating knowledge in biological factors and mediators involved in pediatric asthma; Papers concerning innovation in the clinical aspect, diagnostic approach, and management of pediatric asthma, AI included.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
