

Special Issue

Preventive Health Intervention in Childhood Obesity and Mental Health

Message from the Guest Editors

The increasing prevalence of overweight and obesity in childhood and adolescence is an international concern. Of particular concern is that overweight and obesity is associated with many other conditions including mental health, cardiovascular disease, type 2 diabetes, and some cancers. Therefore, the design, development and implementation of successful therapeutic interventions that target overweight and obesity, and some of the commonly cited comorbidities, are of the utmost importance. This Special Issue, entitled 'Preventive Health Interventions in Childhood Obesity and Mental Health', welcomes original research articles, reviews, and meta-analyses on any subject related to childhood overweight, obesity and mental health.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
