Health Behaviour, Health Literacy and Mental Health in Children

Message from the Guest Editors

The health behaviour of children is changing over time. In addition to well-known and traditional risk factors, new ones have emerged (e.g., the use of electronic cigarettes, heated tobacco products (IQOS), and video game or smartphone addiction) which influence not only the physical but also mental and emotional status of children and adolescents. Some special vulnerable groups (disabled people and ethnic minorities) are more affected; therefore, we must pay more attention to prevention in these groups. The COVID-19 epidemic was a totally new situation in the life of children and adolescents. During lockdown in most countries, distance (online) learning was introduced in schools as a teaching method, which, in some ways, unfavourably affected both the physical and mental health status of this demographic. The isolation and limited communication with peers may have also disrupted the adolescents' mental health.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
