Supporting Children with Chronic Illness and Their Families

Message from the Guest Editor

Globally, children with chronic illnesses are experiencing improved survival due to medical advances. This implies that the number of children surviving to adulthood has escalated substantially over time. Yet, children living with and surviving chronic illnesses require frequent medical care and complex chronic care throughout their disease trajectories. This poses detrimental effects not only on the physical and psychological well-being of both children and their families, but also impairs family functioning. Considering the above, we are organizing a Special Issue entitled “Supporting Children with Chronic Illness and Their Families” in the Journal of *Children*. This Special Issue will provide insights into cutting-edge, multidisciplinary research that contributes to knowledge in this field. We aim to solicit empirical research manuscripts, systematic reviews, meta-analyses, qualitative, quantitative, and mixed-method research, and randomized controlled trials related to providing support in order to improve the well-being of children with chronic illness and their families.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
