Current Advances in Neonatal Care

Message from the Guest Editor

Over the years, public health agencies and healthcare providers have worked tirelessly to improve neonatal outcomes. Although these communities have made great strides in combating newborn morbidity and mortality, substantial room for continued improvement remains. The identification of modifiable social, behavioral, and health risk factors that affect birth outcomes and contribute to neonatal mortality is indeed paramount. Resource allocation to assist with these changes is also of great importance, particularly in underserved populations. In addition, neonatal medical and surgical breakthroughs are key to both diminishing death rates and improving quality of life. This Special Issue of *Children* will feature recent advancements in neonatal care. We invite manuscripts focused on all aspects of newborn management, including reviews and original manuscripts.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
