

Special Issue

Progress in Neonatal Surgical Diseases and Minimal Invasive Treatment

Message from the Guest Editors

The Special Issue of Journal “*Children*” should focus on the advances in Neonatal Surgery. The manuscripts, including original articles, reviews, and case reports, can address pathophysiology, diagnosis, and treatment (medical and surgical) of neonatal disease cases of surgical interest. Of particular interest is neonatal enterocolitis, congenital megacolon, congenital anomalies of the urinary tract, oesophageal atresia, diaphragmatic hernia, lung and chest malformations, etc. Original manuscripts dealing with minimal invasive treatment, bio-markers and prognostic factors are particularly of interest. Pediatric surgeons, pediatric urologists, anesthesiologists, pediatricians and, of course, neonatologists are welcome to make contributions that pay special attention to the most advanced diagnostic and therapeutic approaches.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
