Endocrine and Metabolic Health in School-Aged Children

Message from the Guest Editors

Adolescence is a crucial phase in children's development, characterized by significant physiological changes as children grow rapidly and mature into young adults. It is also a time in which both environmental and genetic factors may contribute to the onset of endocrine and metabolic disorders. In this context, we are pleased to serve as for this Special Issue, entitled "Endocrine and Metabolic Health in School-Aged Children". This Special Issue aims to gather cutting-edge research and reviews on this vital topic, as well as present key studies on both common and rare endocrine and metabolic disorders in children and adolescents, including obesity, diabetes, thyroid diseases, autoimmune endocrine conditions, disorders related to puberty and growth, and the long-term metabolic and endocrine consequences of cancer treatments in childhood cancer survivors. We are especially interested in studies that explore novel etiological factors, biomarkers, underlying mechanisms, and innovative diagnostic and therapeutic strategies for endocrine and metabolic diseases in children.

Guest Editors

Dr. Eryk Jacek Latoch

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
