

Special Issue

Asthma and Its Impact in Adolescent: 2nd Edition

Message from the Guest Editor

Considering the success and popularity of the Special Issue "Asthma and Its Impact in Adolescents" previously published in the journal *Children*

(https://www.mdpi.com/journal/children/special_issues/Asthma_Impact_Adolescents), we will now release a

second Special Issue aiming to gather original research papers and review articles focused on childhood asthma. Bronchial asthma is characterized by high socio-economic impact all over the world and still represents a dramatic burden for all health-care systems. Moreover, at an individual level, subjects suffering from bronchial asthma are frequently limited in their quality of life. Bronchial asthma is extremely multifaceted, particularly in young patients. Several aspects related to bronchial asthma in adolescents have been reviewed and updated thanks to the excellent contributions of our distinguished colleagues in the first Special Issue for which I served as . Other important domains should be considered and discussed in the field of asthma in adolescents in order to provide more appropriate evidence, information and skills that may better support adolescents, their families and their doctors in coping with asthma.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
