

## Special Issue

# Oral Health Promotion in Paediatric Population

### Message from the Guest Editors

Oral diseases are prevalent worldwide and constitute an important global health problem. The influence of oral diseases is beyond the oral cavity and could impact both physical and mental health, as well as overall quality of life. In children, the impact of oral disease could be long lasting as past disease is a significant predictor of future disease, for example, the presence of early childhood caries is a significant risk factor for caries in the permanent dentition. However, most oral diseases are easily preventable, which requires tackling not only individual-level determinants, but also broader community/societal level determinants. In this Special Issue, we invite submissions on all topics related to oral health promotion in children and adolescents including, but not limited to, determinants of oral health, the prevalence of oral health behaviours and their determinants, interventions to promote positive oral health behaviours, health education, oral health literacy, novel concepts in oral health promotion, and oral health promotion policy.

### Guest Editors

Dr. Santosh K. Tadakamadla

Prof. Dr. Loc Do

Dr. Gianluca M. Tartaglia

### Deadline for manuscript submissions

closed (1 July 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.
