Kidney Disease in Children: From Bedside to Bench and Back

Message from the Guest Editors

This Special Issue, entitled “Kidney Disease in Children: From Bedside to Bench and Back”, aims to contain valuable articles regarding all aspects of pediatric nephrology, from fundamental research to clinical application. The readers will have the opportunity to become acquainted with the spectrum of all major aspects of pediatric nephrology, from neonatal to adolescent perspectives, from rare genetic disorders to well-known diseases, and from transient acute kidney injury to irreversible end-stage kidney disease. The content should help to show both scientists and clinicians that there is only one way to form a practical strategy: we must start with in-depth analysis of the changeable clinical picture, then bridge clinical to molecular data before coming back to the patient with molecular solutions to clinical challenges. No matter how far we reach, the patient must remain in focus, and will always give us the final answer. Therefore, let these articles give us courage to come back to the bedside and to use the bench in everyday practice for the good of all patients.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney
Departments of Child Health and Neurology, University of Missouri, 400
